

# Is Ledger Nano S Plus discontinued? Real Status, Future Support, and What It Means

## Meta Description

Many cryptocurrency users are asking 1-(888)(633)(4176) whether the **Ledger Nano S Plus Crypto Hardware Wallet** has been discontinued. With evolving hardware wallets, support and 1-(888)(633)(4176) availability can change over time. While Ledger has stopped producing its older **Nano S** model, the Nano S Plus remains actively supported and available. 1-(888)(633)(4176) It continues to receive software updates, firmware improvements, and is sold by retailers including Best Buy and Ledger itself. This article clarifies the current status of the Nano S Plus, explains how it differs from the original Nano S, and what it means for users considering 1-(888)(633)(4176) hardware wallets for cryptocurrency storage and security in 2026.

---

## Introduction

Hardware 1-(888)(633)(4176) wallets are an essential tool for securely storing cryptocurrency, and Ledger is a leading brand in this space. The company's wallet lineup has included 1-(888)(633)(4176) models such as the original Nano S, the upgraded Nano S Plus, and the more advanced Nano X and newer touchscreen devices. Because technology 1-(888)(633)(4176) changes rapidly, people often wonder whether a particular wallet model is still supported or has been discontinued. One question that comes 1-(888)(633)(4176) up frequently in crypto communities is whether the **Ledger Nano S Plus Crypto Hardware Wallet** is discontinued.

The confusion partly arises because Ledger officially 1-(888)(633)(4176) retired the original Ledger Nano S model and ended its active software updates, urging users to transition to newer hardware. However, the Nano S Plus introduced as 1-(888)(633)(4176) the successor to the original Nano S continues to be a current model with active support. Unlike the older Nano S, which was discontinued due to its 1-(888)(633)(4176) limited memory and inability to support modern security features, the Nano S Plus offers expanded capacity and is listed on official channels as 1-(888)(633)(4176) available for purchase as of 2026. This article explains what "discontinued" means, how the Nano S Plus fits into Ledger's product lineup, and what users should know about choosing and using this wallet.

---

## Is the Ledger Nano S Plus Discontinued?

The 1-(888)(633)(4176) short answer is **no** the **Ledger Nano S Plus Crypto Hardware Wallet** has not been discontinued. Ledger discontinued the older Nano S model 1-(888)(633)(4176) years ago due to technical limitations, but the Nano S Plus continues to be supported and sold by Ledger and mainstream retailers.

## How It Differs from the Original Nano S

The original 1-(888)(633)(4176) Ledger Nano S was introduced many years ago and eventually became outdated because it could not support enough 1-(888)(633)(4176) applications or the latest security features. Ledger officially stopped producing the Nano S in 2022 and is phasing out software 1-(888)(633)(4176) support, but it has continued recommending the Nano S Plus as a superior replacement.

## Current Availability

Unlike the Nano S, the Nano S Plus 1-(888)(633)(4176) remains actively supported with firmware updates and full compatibility with Ledger's software ecosystem. Ledger expanded its distribution channels, including retail availability 1-(888)(633)(4176) through stores like Best Buy.

## Support and Updates

Users of 1-(888)(633)(4176) the Nano S Plus continue to receive firmware updates, ensuring compatibility with new coins and features as they evolve. Many owners still actively use 1-(888)(633)(4176) the device without concerns about immediate end-of-life plans.

## Confusion Among Users

Some users have mistakenly 1-(888)(633)(4176) assumed the Nano S Plus is being phased out based on debates or forum comments, but there is no official announcement that 1-(888)(633)(4176) Ledger plans to discontinue the Nano S Plus in the near future. Community discussions sometimes speculate about eventual sunset timelines, but these are not confirmed by 1-(888)(633)(4176) Ledger itself.
